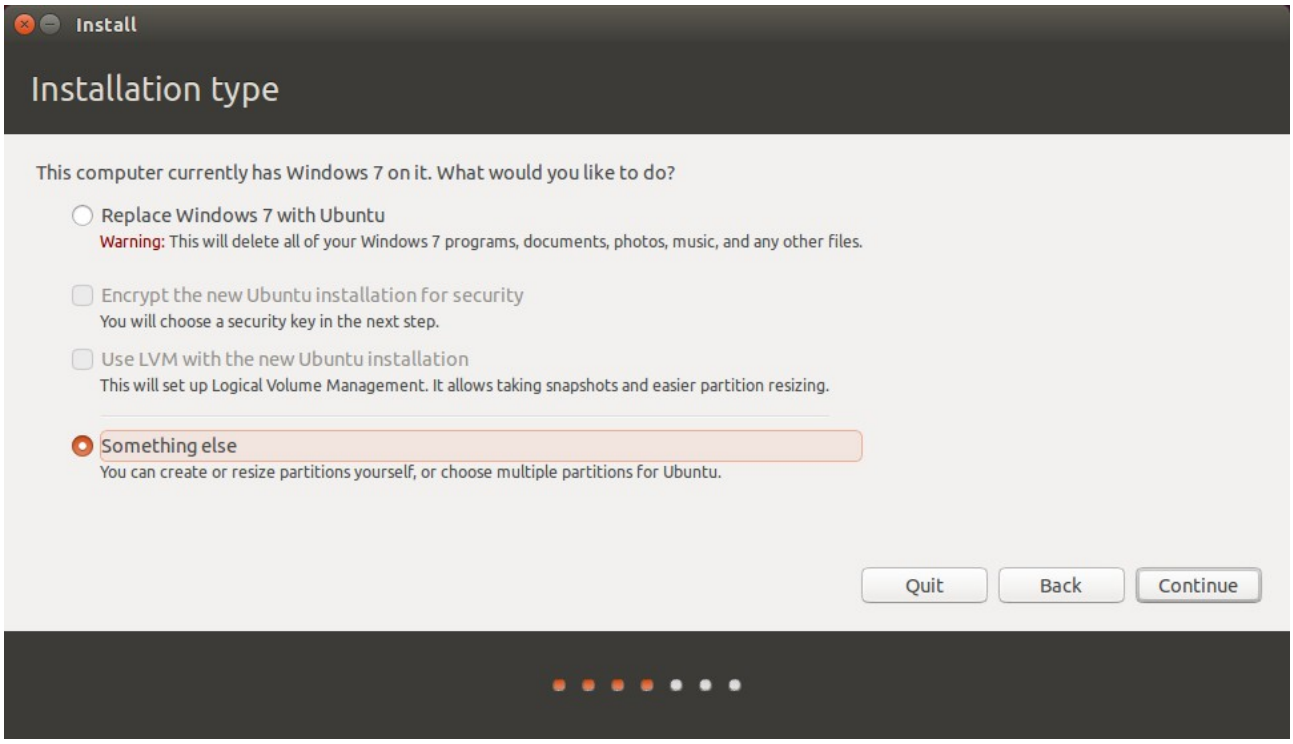
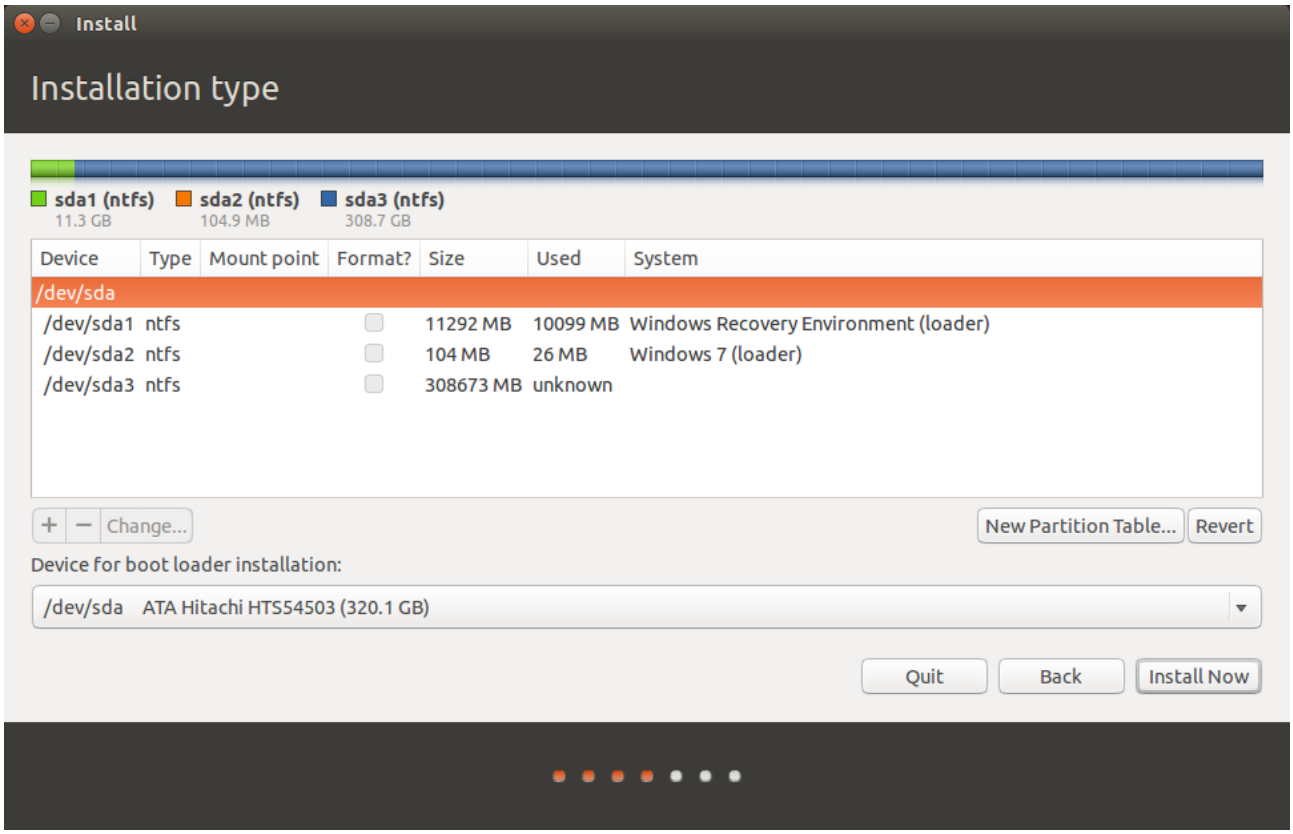
I am running Windows 7 Home Edition on my Sony Vaio laptop.

At this moment I am typing from the Live USB Ubuntu 14.04 LTS. I want to install Ubuntu and dual-boot. When I try to install Ubuntu, the “install alongside” option is not available.



Install
Installation type
This computer currently has Windows 7 on it. What would you like to do?
Replace Windows 7 with Ubuntu
Warning: This will delete all of your Windows 7 programs, documents, photos, music, and any other files.
Encrypt the new Ubuntu installation for security
You will choose a security key in the next step.
Use LVM with the new Ubuntu installation
This will set up Logical Volume Management. It allows taking snapshots and easier partition resizing.
Something else
You can create or resize partitions yourself, or choose multiple partitions for Ubuntu.
Quit
Back
Continue

I don't want to delete Windows 7 (yet), so I guess I have to choose Something else.



With that window, I have no idea what to do. Can someone guide me? Thank you very much.
